There are aproximately a colony of six hundred people there that have depended on comercial fishing for a livelyhood for eighty years. they have exausted every last resource they have ; and are on their last leggs. i don;t know wether we lack the sex appeal or the come heather, for we haven't seemd to get any place untill the last few days. They have passed a law to pay circulators of petitions, consequently, owing to lack of finance we are obligated to ask all labor organizations to help put this over. We were forced to place one cent per pound on fish to finance the fight; and in our short season, we raised $1200.00. We only ask a short season of 92 days from some time in Mar. till some time in June.
Our hatchery have turned out four million fish , we only ask fair devission of natives bounty.
